

Replacing your FiOS/U-verse Battery: GT12080-HG

****Note: Next generation GT12080-HG officially replaces the PX12072-HG for your existing unit****

Some important facts you should know:

Always exercise caution when working around batteries:

- Do not lay any type of metal object on or across the battery terminals as this will short the battery.
- Keep batteries out of reach of children.
- Never smoke in the vicinity of a battery.
- Wear protective eyewear when working with batteries.

Replacement Directions:

The Broadband Battery Back-up Unit (BBU) is most often located outside in the garage or in the home in a different location from the Optical Network Terminal Box (ONT).

Follow these steps carefully when replacing the battery.

- Locate the BBU and remove the cover on the unit.
- Remove the spent battery (taking care not to damage the connecting wires; they will be reused).
- Carefully remove both the black and red wires (noting the manner in which the wiring ends slide on the battery terminals).
- Remove the new battery from the packaging and remove the protective plastic covers from both the negative and positive terminals on the top of the new battery.
- Slide your current BBU's connecting wires onto the appropriate battery terminals noting **Red (+) = Positive and Black (-) = Negative**. Be sure to connect the red terminal of the battery to the red terminal of the BBU and black terminal of the battery to the black terminal of the BBU.
- Replace the battery in the compartment by following the instructions located on the label inside of the BBU.

Customer Service:

We strive to provide a quality product each and every time, however should you experience a problem please follow the steps below.

1. If after replacing the battery you continue to experience problems with your service or BBU, please call your service provider.
2. For questions/issues involving the battery itself, please contact GS Yuasa Energy Solutions at the number located on the bottom of this page.

Disposal of Spent Battery:

We encourage you to dispose of your battery in an environmentally friendly manner.

Take the battery to any local retail business that is authorized to recycle a battery in accordance with all state, local, and federal laws and regulations.

A searchable, comprehensive list of recycling locations can be found at www.Call2Recycle.org. By phone at: 1-877-2-RECYCLE
