A message from Bill Moll, President, GS Yuasa Energy Solutions, Inc.

GS Yuasa Energy Solutions, Inc. (GYES) has received questions concerning the impact of the COVID-19 virus on our manufacturing facilities and the continued supply of product to our customers.

GYES is in regular contact with our factories in Taiwan and Japan and neither locations have experienced any raw materials or parts shortage or slowdowns. They are manufacturing and shipping products on time so GYES will continue to receive a continuous and steady supply of product.

Each factory has taken measures to protect its workers as their health and safety is very important to GS Yuasa Corporation, our parent company based in Japan.

In addition to receiving batteries, GYES maintains a safety stock of products at our warehouse locations here in the USA. The combination of our safety stocks, plus the steady flow of batteries from our factories, will ensure our customers a steady and reliable source for their battery needs.

GYES has also implemented a COVID-19 Policy for our office in Roswell, Georgia. Should we experience an event which necessitates working from home, our team will continue to be available to our customers for all customer service and sales functions either by phone or email.
